Note

Employer specific amounts that are excluded from these example calculations and journal entries are the change in proportionate share and differences between
employer contributions and proportionate share of contributions as defined in paragraphs .64 and .65 of GASB Statement No. 75, Accounting and Financial
In the initial year of implementation, there is no change in proportionate share as OPERS calculated only one proportionate share and employers apply that share to both beginning and ending Net OPEB Liability amounts. OPERS concluded that the calculation of two proportionate shares, for both 2017 and 2016, was not necessary as the impact to calculations would result in immaterial differences. OPERS external auditors agreed with this conclusion.

Since OPERS is using actual contributions submitted by employers for the measurement period (January 1, 2017 through December 31, 2017), there should be no differences between employer contributions submitted and those contributions used to calculate proportionate share percentages.
